

## Computer Environment for CSE 264 – Web Systems Programming

(I will keep adding tools to this as we need them)

### 1. **Java Compiler 8**

If you don't already have Java 8 installed on your laptop/desktop:

Go to <http://www.oracle.com/technetwork/java/javase/downloads/jdk8-downloads-2133151.html>

Under the section “Java SE Development Kit ...”

Select “Accept License Agreement”.

Click the link for your OS and install the JDK.

### 2. **NetBeans 8**

Go to <http://netbeans.org/>

Click “Download Free NetBeans IDE 8” Button

Either unclick the subscription checkboxes in the upper left corner or enter an email address.

The Platform field in the upper right corner should have your OS selected. If it doesn't, then select it from the dropdown.

(So how do you think the NetBeans site knew your platform? We'll find out next class!)

In the rightmost “All” column, click the Download button.

Install NetBeans 8

### 3. **XAMPP**

Go to <http://www.apachefriends.org/en/xampp.html>

Click on the link for your platform (Windows, Mac, Linux)

Follow the directions to download and test.

or, if you're using Mac

MAMP

<http://www.mamp.info/>
